THE REMINGTON STANDARD TYPE - WRITER.

A Machine to do the Work of the Pen.

IT writes, or prints, by the depression of the keys (similar to piano-keys); and the operation is so simple that any one who can spell, can write or print with it. It does the work of several penmen, and much more neatly and legibly. It furnishes a new avenue of ready employment for ladies and gents, the demand for Type-Writers being greater than the supply. Information, in regard to cost of machines, furnished applicants, and the machines delivered free of express-charges.

EMINENT NUMISMATISTS, PAST AND PRESENT.

BY E. LOCKE MASON.

NO. III.—JOHN C. SCHAYER.

Among the noted Boston numismatists, either as a coin dealer or collector, Mr. John C. Schayer occupies a prominent position. Although engaged, like many of our American collectors, in mercantile pursuits, he has found time to accumulate a large variety of gold, silver, and copper coins, and has had in his possession some of the finest and rarest of American and foreign pieces.

Mr. Schayer is a Boston boy; born in Washington Street, 1837.

His principal employment outside of coin studies is buying and selling alligator-skins; and so well known has he become throughout the United States in this connec-

tion, that he has been entitled "THE KING OF THE ALLIGATORS." One great object in life with Mr. Schayer has been to collect every known American, colonial, or United-States coin; and in this effort he early began to accumulate large quantities of duplicates, having vast numbers of the early gold eagles, half-eagles and quarter-eagles; also gathering together at one time in his numismatic career thousands of the early United-States silver dollars, halves, quarters, dimes, half-dimes, as well as copper cents and half-cents by the tens of thousands. Upon one occasion, Mr. Schayer sold to Mr. L. G. Parmelee upwards of three thousand United-States copper half-cents. To show the extent of his accumulations, we would cite one purchase by Mason & Co., wherein the former sold to the latter firm two hundred proof-sets of United-States coins bearing dates 1859 to 1884. Mr. Schayer sold recently one dozen California gold "slugs" (fifty-dollar pieces), and at least nine thousand dollars' worth of the early American gold coinages. Well does the writer remember Schayer's old-fashioned basement-store on Devonshire Street, in the rear of which were cabinets upon cabinets of foreign and American copper coins; and here met upon many occasions the distinguished coin-collectors of Boston, seeking after rarities to complete their various coin-sets of American issue.

In paper currency alone Mr. Schayer was deeply concerned, and accumulated such a vast hoard of the postal and fractional currency of the United States, that the amount in dollars became so great that he was compelled to sell and engage in the cheaper sort, viz., the paper currency of the Confederate States; and at this day he has stored away over a million dollars of the C. S. A's promises to pay.

During the temporary excitement of a couple of years ago, in Europe, that sent Confederate bonds up from twenty-five-cent *curiosities* to twelve or fifteen dollar bonds (of a thousand dollars each), Mr. Schayer reaped a golden harvest. In conclusion, we would add that the subject of our sketch has handled some of the largest cabinets of coins in the country, including those of Col. Adams, Colburn, Appleton, Freeman, Stetson, and Abby.

CURRENT THOUGHTS ON COINS AND COINAGE.

BY ROBERT MORRIS, LL.D., OF LA GRANGE, KY.

PART TWO.

IN the Solomon Islands, the monetary unit is a *cocoanut*: the circulating medium is strings of shell-beads, of different colors, and teeth of dogs and porpoises. One hundred white shells is equal to ten cocoanuts, or a hand of tobacco. One thousand white shells are equivalent to one hundred red shells, or a dog's tooth. Ten dog's teeth (that is, ten teeth from one dog) is forty porpoise-teeth, and five hundred porpoise-teeth is the purchase-money of a first-class wife. To resume: a female partner fair and young will fetch, in the Solomon Islands, ten thousand cocoanuts.

The profits of coinage, were it not for the enormous cost of buildings and machinery, and running expenses, are notable. Taking the silver dollar of 412.5 grains as a basis, one hundred of these will make \$427 in quarters. One hundred trade-dollars of 420 grains make \$475 in quarters. The profit in the former case is \$6.75, in the latter, \$8.75. From a bar of pure silver weighing nine hundred ounces, and costing, say, \$1,170, with one hundred ounces of copper thrown in, a lot of quarter-dollars can be made, having a market-value of \$1,224. This pays well. Of course the object of debasing this subsidiary coinage is not to make these profits to the government, but to prevent exportation of the coins, and their use in the arts. In the old times, silver and gold coins, being nearly pure, were melted up in great quantities by jewellers and others.

The old-fashioned copper cent first weighed 208 grains of pure copper. Out of a

pound of metal (5,760 grains) twenty-seven of these coins could be made. This seems to imply a loss in the coinage: certainly there was no profit. But when the weight of the cent was reduced to 178 grains, so that thirty-two could be made out of a pound, matters were brought nearer an equality. With the present weight (48 grains), 120 cents come from a pound of metal, and the government profit is very large. Suppose, as in some years, thirty millions of these are coined for circulation, as \$300,000, the profit of coinage would run up to some \$200,000.

The American bronze cent is the handsomest coin of all little pieces in the world. These are only struck in the Philadelphia Mint; but the issue there is enormous. To watch the machines in motion, and see how fast the little fellows fall into the boxes below, is fascinating. From thirty to forty million cents a year are absorbed by the people of this great Republic. There are probably a thousand millions of them now in existence. In the Eastern States is the greatest demand, next to that the Middle States, then the Western. The South is just beginning to see the convenience of their use; and it will not be long until clamorous calls will come from there. There is no profit in counterfeiting them, therefore no suspicion can ever attach to them.

Two merchants in Philadelphia, Penn., in 1877, were condemned in the United-States Court to fines of one hundred dollars each, for circulating advertisements in the form of government money. Much of this stuff was in circulation at that time in hundreds of forms, — in common paper, *papier maché*, and other substances, — and the unwary were often tricked thereby. One patent-medicine company issued bills marked ten, twenty, fifty, and one hundred dollars, that were closely copied from bank-notes. The United-States officers finally stopped these issues, and burned in one cremation notes stamped for \$1,200,000.

The standard weights of our *gold coins* are thus listed: —

Dollar	25.8 grains	[25.67]	Half-Eagle	129 grains	[128.36]
Quarter-Eagle	64.5 “	[64.13]	Eagle	258 “	[256.71]
Three-Dollar Piece	77.4 “	[77 02]	Double-eagle	516 “	[513.42]

The figures in brackets show the minimum weights at which government officers take the respective coins after the wear and tear of handling has abraded them. The legal limit of abrasion, for coins in circulation twenty years and upwards, is one-half of one per cent, and a proportionate rate for a less period. If you take a gold coin to the sub-treasury, and its weight falls under the figures in brackets, they will punch it deeply with the letter “L” (“light”), and return it to you.

The wreck of the schooner “Vermillion,” sunk in 1853 near Erie, Penn., with three hundred and fifty tons of copper (worth some two hundred thousand dollars), has been discovered, it is claimed, by the aid of a metallic rod, and the valuable metal recovered.

A mountain partridge, killed in 1880 near Pine Creek, Ore., was found to carry nearly a dollar's worth of gold-dust in his gizzard. If his dying confession was recorded, it will develop some new and valuable placers.

In the year 1780 the British frigate “Hussar,” which had come out from England with treasure to pay the troops then operating in the vicinity of New York, came into Long-Island Sound at Newport, landed at Stonington, and took in a lot of American prisoners, and was then wrecked in Hurl Gate. Her bow being stove in, she turned round, drifted past Randall and Ward's Islands, and sunk in seventy-five feet low tide. It was said at the time that the money on board amounted to nearly ten million dollars. The prisoners were drowned, and the treasure lost. When the writer was a boy, it was not uncommon to hear of single coins being picked up along the shore, believed to come from this wreck. In Barnum's old museum was a mass of silver coins resened here.

In 1794 two British brigs were sent to search for the treasure, but one was accidentally swamped near the wreck of the “Hussar”: the other was ordered away by the Federal authorities. In 1819 an American company was formed for thorough ex-

plorations, and the search has been continued ever since. Amongst other discoveries, a bronze cannon has been raised, for which the British Museum gave fifteen hundred dollars. It is proper to say, however, that James E. Gowan, whose skill in raising the submerged ships at Sebastopol gave him so much reputation twenty years since, gives his opinion that the money had been landed and distributed before the wreck.

The British sloop-of-war, "De Braack," sunk in 1798 off Lewis, Del., with bullion and gems recently captured from the Spaniards, and valued, it is said, at fifty-two million dollars. A Philadelphia company has been for some years searching the ocean-bed in that vicinity for the wreck.

NICKEL AND BRONZE CENTS.

THE nickel and bronze United-States cents in uncirculated condition are becoming scarce, and full sets are on the increase in fictitious value. The rarest of the nickel cents are 1856, 1858 (patterns), and the 1859's, with wreath and shield on the reverse. The rarest bronze cents are the 1877's. Full sets on hand and for sale at this office, in the finest condition.

THE OLD COIN.

A MASSY lump of brass and bronze,
Moulded by ponderous blow on blow,
For Nero or Vespasian's son,
In ages dim and long ago.

A cruel mouth, a swinish chin,
A wolfish eye, almost erased;
But half the date — a Victory —
Two words, and those almost effaced.

Where is the golden palace now
That on the Palatine arose?
Where are the statue-guarded doors?
Where are the temple porticos?

For discs of metal shaped like this
Swords have been drawn and Lethe crossed;
For this, in greedy hope, men's souls
Have been by passion tempest-tossed.

This is Ambition's high reward,
This is a buried Cæsar's fame:
Upon a lump of rusty bronze
The two-thirds of a doubtful name.

THE "BUNG TOWN."

BY NEMO.

A WORTHLESS lump of tarnished brass,
 Defaced by many a thump and blow,
 And made from hand to hand to pass
 Like doughnuts at a cattle-show.

A sheepish eye, a battered chin,
 A nose, the outline none can trace;
 The hat, if any, broken in;
 Faint semblance of the human face.

Where is the seedy loafer now
 That loved the music of its clink?
 Where is the "open bar," o'er which
 It often has been passed for drink?

Rude lumps of metal shaped like this
 Have in the air oft-times been tossed,
 When for the "drinks" the game was played,
 Where heads have won, and tails have lost.

"This is Ambition's high reward,"
 This is the new collector's aim,
 That, with a score of coins like this,
 He can a fine collection claim.

A NUMISMATIC TRIP TO EUROPE.

BY THE EDITOR.

[Commenced in the June number.]

AT the dinner-table there is common wine in abundance, rich, red, and inviting; while champagne, ale, and porter bottles stand here and there, ready for the cut, snap, and pop, accompanied by the foaming overflow of the sparkling and slightly intoxicating beverages. H'm, thank you, "none for Jo!" While at dinner, a little unpleasantness occurred between our head and stomach, and at a very inopportune moment, — just as the dessert was to be devoured.

Not being able to conciliate the contending emotions *above* and *below*, we very considerably left the table, and our share of good things, for the other and more healthy and hungry passengers, and sought the upper deck, where, by dint of exercise and fresh air, we succeeded in coaxing up an appetite for the six-o'clock supper.

Thus far, all augurs well, — a race, a companion who is a coin-collector; and then, in case of accident, the steamer "Batavia," our opponent, will be at hand to render assistance.

Made the acquaintance of a Frenchman, who, after an absence of twenty-three years, is returning to France to find it, as he said, "all damned with ruin, and gone to de debbil." He was bitter against the Commune party, and afforded us considerable amusement and instruction by the pictures he drew of the principal public men of France now in power.

As the sun sinks towards the blue water of the ocean, the wind increases, and our

good steamer, under an increased head of steam and sail, is ploughing the waves beautifully. After the supper, there came the afternoon tea and toast; and *such tea*, and *such toast*, I never had the equal of. Few, too few, at tea. Most of the passengers have accounts to settle with Neptune, which will keep them busy thinking of home and the doctor. The steamer "Batavia" has fallen off upon another course, and is far away to our left, with nothing in view but her sails, all of which are set. An Irish lady, and child ten years of age, next us at table, said she was all the way from Colorado, where her husband kept a liquor-store, and that she was going to visit her relatives in Ireland, and spend the summer. Her breath had the aroma of her liege lord's Colorado liquor-saloon.

My German state-room mate has retired, to forget, or *try to forget*, that he is on the big, broad ocean, and "sick as blue mud." He can't forget, nor dream, nor sleep; for memory and dizziness bring to mind and mouth, thoughts and things that must be uttered, whether the last poetic thought, or the last piece of bread buttered.

Retired at ten o'clock, and had a pleasant and comfortable night's rest.

April 30, five A.M. Up early to take a look at the vast expanse of water surrounding us. It is a bright, beautiful day. The sun glistens on the wave-crests; and the silver spray from our bow, as it cleaves through the foam, resembles a mass of brilliants, dazzling and charming the eye beyond description. There is considerable motion to the vessel, and it would require considerable dexterity to walk a "B-line" on the vessel's deck. It is Sunday morning. We are the only passenger on upper deck enjoying this glorious, heaven-like morning. The fresh, salt air, as it enters the nostrils, as we pass from the small confined state-room to the upper deck of the vessel, is refreshing, indeed, and can only be enjoyed by those who have long resided inland, or distant from the salt water. This air at sea is so bracing, so delicious and enjoyable, that it makes one feel lighter, happier, and at peace with everybody, and almost wish to remain for life on such a sea as this. We have a moderate breeze this morning, a clear sky, and all sails unfurled. Nothing in sight, no land, no vessel, — all one great expanse of water stretching out under the blue sky, which meets it everywhere.

Nine-o'clock bell rings for breakfast; and here I would repeat that we have coffee and biscuit at six A.M., breakfast at nine, lunch at twelve, dinner at four, and supper at eight. Plenty to eat, and all of the very best quality. Many of the passengers keep their state-rooms for reasons satisfactory to themselves. We made an effort to smoke a cigar after breakfast, but only partially succeeded; for we felt that there was an inward monitor whose influence could not be disregarded: so we gave the cigar to the sea-gulls that are continually floating through the air at the stern of the vessel, thinking this a better policy than parting with a good breakfast to fatten those same greedy gulls who so eagerly sear the white froth that forms a retreating and receding line far in the wake of our steamer.

Sailors bracing around yards to the tune of some lively refrain; the only part we could make sense of being, —

"Oh, I wish I was in Liverpool!"

sung by a leader, immediately followed by a score of seamen pulling at the ropes, and singing in chorus, —

"Pull a hand down,
Pull a hand down, Billy;"

then the boatswain's shrill whistle, and more singing and pulling.

Looked at compass; we are heading between east and east by south-east. Ship rolling tremendously; heavy sea; can't write a straight line or word. A heavy fog gathered ahead, and, in less than half an hour, disappeared; and now all is clear and bright again. One sail only in sight, and it far, far away: all else a broad expanse of mighty sea. Vessel sails more quietly; wind favorable. Twelve M., bell rings for lunch. First course, soup; then cold meats. Asked the steward if we would have re-

ligious services to-day ; said he thought not, as nearly all the passengers were too sick to leave their rooms. Our German room-mate has not left his bed since yesterday evening ; and we find much pleasure in the companionship of the French gentleman previously alluded to. He is visiting Europe to buy furs and raw silks to take to Canada, his home, on speculation.

Sailors again singing,

“I wish I was in Liverpool!”

and we had finished lunch, and essayed to smoke our second cigar. The taste of the tobacco suggested a change in one word of the sailor's refrain, — the substitution of Philadelphia for Liverpool. However, we were not sick, and have thus far been exempt from sea-sickness, excepting an inclination that way, which the sight of pastry, or our German friend, invariably produced.

SUNDAY, April 30.

ABSTRACT OF LOG.

Latitude 40° 25' North.

Longitude 68° 29' West.

Course, East. Distance, 255 Miles.

12 Noon.

(Signed)

HENRY TIBBETS, *Captain.*

Having sailed two hundred and twenty-five miles from two P.M. April 29, to twelve M. April 30, or about eleven and a half miles per hour, and the distance, say three thousand miles (New York to Liverpool), we should arrive at the latter port inside of eleven days from the hour of sailing, or on the morning of May 9.

At four P.M. to-day had a splendid dinner ; the food and manner of cooking unexcelled anywhere. No religious services thus far, which we regret, as we think nowhere could such services be more welcome, and more needed, than on the bosom of the great Atlantic, on board of the great ships filled with so many human beings. Tea at eight. After tea, spent an hour in the smoking-room, enjoying a smoke, and the experiences of fellow-travellers, related rather freely for a Sunday evening. Bed at ten. Had a good night's rest.

May 1, five A.M. Wind, north-west, which is fair for sailing on our course (east by south). Sea heavy, and sky filled with heavy black clouds, portentous of bad weather ; ship making thirteen knots, at times rolling and pitching fearfully. The sea has changed from a dark-blue to a dark-green color, and the white wave-caps are dancing in continuous rows, presenting a pretty ocean picture.

At last we have an opportunity to introduce the coin business to a few of the well passengers gathered in the smoking-saloon ; and here commenced discussions and exhibitions of coins that led to many pleasant exchanges, and profitable transactions for the writer.

[To be continued.]

OTIS GRAY RANDALL.

MANY coin-collectors will remember the old coin broker and dealer, who, for about fifty years, was located at the head of State Street, this city, and whose window had such a tempting display of gold and silver coins, currency, and postage-stamps. It seems that Mr. Randall kept illegally a “Bank of Deposit,” and received the hard-earned wages of mechanics and sailors, paying them from six to ten per cent interest. Last June, after a persistent but unsuccessful effort to sell his good-will and fixtures to Mason & Co., coin-dealers, he departed for parts unknown, and has now been arrested at Brockton, Mass., and held for defrauding the parties who were drawn into his “Bank of Deposit.”

AMERICAN GOLD COINAGES.

BY E. LOCKE MASON.

UNITED-STATES GOLD DOLLARS.

THE first regular issue of the United-States gold dollars were the small, thick pieces, bearing date 1849 to 1853 inclusive. In 1854 the large thin gold dollars (see cut) appeared, and have been coined every year up to the present time, although, for the past few years, not put into general circulation. The 1884 gold dollar can only be had in proof condition, having been coined and sold in gold sets, which cost \$43 per set, and not coined for circulation. There are a number of the gold dollars in the 60's quite rare, and the 1875 is very difficult to obtain. We keep a supply of the small and large gold dollars for collectors (in very fine condition) at the following prices; viz., 1849 to 1853 inclusive, \$1.25 each; 1854 to 1884 inclusive, from \$1.15 to \$2.50 each; 1884 proofs at \$1.50 each.

CORRESPONDENCE.

SOUTHBRIDGE, MASS., Aug. 21, 1884.

Have sent postal-note for subscription. Your MAGAZINE is first-class.

F. E. N.

WEST RUTLAND, VT., Aug. 20, 1884.

MASON & Co.

Sirs, — The MAGAZINE received the 15th. Was very well pleased with the same. I think Brother Morris's "Level and Square" is the best thing I ever saw, and I propose to read it in lodge at our next regular meeting.

W. J. A.

NUMISMATIC REVIEWS.

THE YOUNG MINERALOGIST AND ANTIQUARIAN.

No. 2 of this monthly received, and is filled with very interesting reading. The only coin article we find is embraced by the following complimentary notice: —

"Frossard, editor of 'Numismia,' has excluded all advertisements, and devotes his paper solely to reading-matter; at which E. L. Mason, publisher of COIN COLLECTORS' MAGAZINE, with a yell of delight, exclaims, 'One man's meat is another man's poison, so we take the *meat* in the shape of 'ads,' and thank Brother Frossard for the boost he gives us by dispensing with advertisements.' We can't see where the 'boost' comes in. Mr. Frossard probably knows what he is about." — *The Young Mineralogist*.

[We regret that our young mineralogical editor is not less *mineral*, and more *logical*. If Brother Frossard dispenses with coin-dealer's advertisements, another brother may gather them. Oh, you see it now, of course you do! The "boost" is all right, and the money received, or the "*meat*" discarded, by Frossard, makes us, in time, a healthy meal. Do *thou* likewise, and we will know what *you* are about. — ED.]

COIN PRICE CURRENT.

1884.

[We shall make every exertion to fill orders from this list, but would solicit our patrons to name other pieces wanted when a special piece cannot be obtained.]

Every Coin Collector Wants It! Bankers, Brokers, and
Store-Keepers Use It!

HATCH'S POCKET COIN TEST.

A SAFE, CONVENIENT, AND INFALLIBLE DETECTOR OF COUNTERFEIT COIN.

1 ENGRAVING No. 1 represents the exact size and form: Nos. 2 and 3 show the Test open, and ready for use. It can be carried conveniently in the vest-pocket, and, with reasonable usage, will last a long time.

effective, as is evidenced by the coin changing color instantly. It has no effect on gold or silver. It is widely recommended by bank officials and bankers as the best and most convenient Test ever offered to the public.

TREASURY OF THE UNITED STATES, Aug. 14, 1881.

GENTLEMEN: Sir, — I have examined your Coin Test, and find that, for detecting spurious coin, it is equal to liquid acid; and that for convenience in carrying, and the ease and quickness with which it can be used, it is superior to any test that has been tried in this office.

Very respectfully,

JAS. GILFILLAN, *United-States Treasurer.*

DIRECTIONS FOR USING.

Molsten the coin, then apply the test. Spurious coin changes color instantly, but it has no effect on good coin.

Sample by mail, post-paid, 25 cents; 1 dozen, post-paid, \$2.00; 6 dozen, by express, \$9.00; 12 dozen, by express, \$16.00.
